**Nature highlights**

Our forests provide home to deer, elk, beaver, badgers, and a variety of other wildlife, including wolves and bears. Forests also offer us berries, mushrooms, and Christmas trees.

The coastline is predominantly covered with the white sand, providing secluded stretches for hikers and beachgoers to enjoy.

**Biggs, swamps, and meadows** present captivating landscapes and a vibrant array of colours. They can be explored safely using wooden trails or bog shoes.

There are also excellent opportunities for canoeing and boating, featuring mostly calm waters, occasional rapids. Islands are Estonia's speciality - numerous, small, and diverse.

Four seasons bring distinct experiences: nature awakens in spring, summer indoors with saunas, autumn displays vibrant colours, and winter blankets everything in cold and white.

**Sea Kayaking**

See Kayaking and wild camping expeditions and tours with British Canoeing certified leaders on the stunning archipelago of Estonia. Two days of kayaking and wild camping in the bird and seal paradise of western Estonian archipelago. Fully guided with transfers.

**Seal watching tour**

Join a seal-watching tour near the Matsalu islands, a natural retreat for seals. To encourage the seals to come out and feed us we use a clever lure. Classical music. On our trip we will talk about the smaller Estonian islands and about the seals' everyday life. It is possible to embark on a day trip or a tour that includes an overnight stay on the island as well.
